January 2017

OncoBioPharm Ltd is seeking to appoint a part-time Biology Study Manager

Attractive salary, negotiable depending on experience

OVERVIEW

An exciting opportunity to join a small, flexible biotech company in central Edinburgh as a Biology Study Manager helping to develop novel antibody therapeutics. We wish to appoint an experienced immunobiologist to coordinate and manage our exciting research programmes. We offer a friendly and flexible working environment, centrally-located in pleasant offices in Edinburgh.

JOB DETAILS

20-25 hours per week negotiable, based on 4 or 5 hours per day. The two main programmes to be managed are early-stage. We envisage a daily part-time role initially, and this may evolve into a full-time position. The role will involve designing, planning and overseeing experiments in conjunction with CROs and academic partners, devising and testing hypotheses using appropriate resources and data, analysing and interpreting data, writing and reviewing grant applications and working on scientific papers, applying for research funding and attending conferences. The right candidate will be self-motivated and methodical, with excellent attention to detail and communication skills. He/she will be highly proficient at creating and reporting against current data and hypotheses.

SKILLS / EXPERIENCE

Highly desirable:

Life Sciences PhD with immunobiology experience in the fields of oncology and/or autoimmune diseases

Goal-orientated with excellent communication and reporting skills

Critical and methodical thinker

Expertise in white blood cell behaviour in the context of immunooncology and/or autoimmunity

Desirable:

Experience of work with/within a CRO

Project experience

Industrial experience

Awareness/understanding of pharmaceutical regulations

BENEFITS

Family-friendly, flexible employers

Benefits package including pension and discretionary bonus

Childcare vouchers

Application deadline: 27/2/17
